Liefgreen's Anemones

These lovely flowers are deservedly popular. With an exceedingly wide range of color and color combinations, and an adaptability for both forcing and out door planting, the Anemone is a most useful and satisfactory flower. The plants thrive best in a rather rich, sandy loam, but will do well in most any well drained garden soil. Ready September 1st.

Culture: For pot forcing, place six or more in a pot of proportionate size and handle the same as Tulips and Hyacinths, keeping them well watered at blooming time. For outdoor, they are suitable for borders, rockeries and mass bedding. Plant the tubers 6 to 7 inches apart, 2 inches deep, laid flat with the growing knobs upward. Soaking the tubers before planting hastens the blooming. In warm climates, free of heavy freezing Anemones may be planted from early fall to early spring and several plantings will produce a continuous bloom in 4 to 5 months' time. Under colder conditions, a mulching of leaves and litter is necessary and in regions of extreme cold, the tubers should be carried over in a cold frame and planted in the spring. After flowering and the leaves have died off, lift the tubers, dry and store in dry sand until next planting time. In warm climates they may remain in the ground and rested under rather dry conditions.

Anemone, Monarch de Caen

'Giant Tecolote' Ranunculus

By far the most magnificent strain of Ranunculus ever offered to the public. Flowers very double, blended with semi-double. Centers are usually light green. Our mixture contains a beautiful range of colors. Do not confuse them with the cheap kinds offered at bargain prices. All sizes as offered are strictly up to standard.

Culture: In warm climates, Ranunculus may be planted in early fall for winter bloom and from that time in succession until spring. For pot grown winter flowers, plant early in fall, water thoroughly and plunge in ashes or sand until they are sprouted.

The bulbs resemble tiny clumps with finger-like projections which should be planted pointed down. Soak the bulbs in water 2 hours and cover about 2 inches deep, 4 to 6 inches apart, and if soil is at all heavy, cover with peat moss in order that leaves will push through readily without heaving the soil. A rich under-soil is desirable, but use no fresh fertilizer around the bulb. Plant in a partly shaded location, particularly if grown for blooming in late spring or early summer, otherwise if planted in locations like the Phoenix, Arizona, valley during the fall months, in a sunny, open location. An abundance of water and good drainage are essential.

EXTRA LARGE JUMBO BULBS—Mixed colors. 15c each, \$1.25 per dozen, \$9.00 per 100.

REGULAR JUMBO BULBS—Mixed colors. 10c each, \$1.00 per dozen, \$7.50 per 100.

Giant Tecolote Ranunculus

Liefgreen's Beautiful All-Colored Freesias

Liefgreen's Giant Fragrant Freesias

Ready in August

An easily grown, attractive and fragrant flower for both indoor and outdoor culture. Few bulbs flourish in the home window with so little care as do the Freesias, and a single plant in flower will soon fill the room with a most delicate perfume. The new colored varieties are charming and all make excellent cut flowers.

Freesia Culture: Freesias may be planted from August 15th, through January. They are easily grown, blossom freely in early spring and the bulbs will multiply and continue blooming for years. The soil should be well prepared, and though they grow well in full sun, they also may be planted in partial shade. All Freesias are fragrant and make good cut flowers.

Plant the bulbs one to two inches apart and cover to a depth of about two inches. In place of a single row place bulbs to make a row three or four inches wide, giving a very nice effect.

Freesias may be left in the ground from year to year or if they are taken up it should be done after the foliage has become entirely cured or dry.

Gorgeous "Tecolote" Hybrids

The name "Tecolote" has become synonymous with perfection in bulbs. We are offering this strain of giant flowered Freesias in a mixture of delightful colors—every one a superb achievement. For the garden these lovely flowers surpass all the older types. Those who grow Freesias indoors for forcing as cut flowers will marvel at their strong stems and uniform flowering habit. They make excellent cut flowers.

MIXED COLORS

Special top size—75c per dozen, \$2.80 per 50, \$5.50 per 100.

New "Tecolote" White Freesia

Iris, Wedgwood

Ornithogalum Arabicum (Star of Bethlehem)

Throws up a tall stem with a cluster of star-shaped flowers; pure white with dark centers. Excellent for cutting, lasting a long time in water. Culture in the house about the same as for Hyacinths. 25c for 2, \$1.00 per dozen, \$7.00 per 100. Postpaid.

Hippeastrum Amaryllis

Ornithogalum Arabicum

DAFFODILS and NARCISSUS

All varieties are easy to grow and are very popular as cut flowers because of their splendid keeping qualities. They may be grown in cultivated beds or borders or in the shrubbery border where they may be allowed to naturalize. While they prefer partial shade, they will thrive in full sun. Plant from late September through January in any good garden soil, covering to a depth of 5 inches.

All Narcissus may be grown in bulb fibre and culture is the same as for Hyacinths.

Trumpet Daffodils

KING ALFRED—This is one of the largest flowers and longest stemmed varieties now being offered. The flowers are pure yellow, the trumpet is slightly frilled and usually 3 or 4 flowers are produced from each bulb.

Large Bulbs—25c each, \$1.35 for 6, \$2.50 per dozen, \$18.00 per 100.

SPRING GLORY—Yellow trumpet with creamy white perianth. Large bold flower of exceptional beauty.

Large Bulbs—25c each, \$2.50 per dozen.

EMPEROR—Brilliant golden yellow flowers of immense size, with wide over-lapping perianth. Extra fine.

Large Bulbs—25c each, \$2.50 per dozen, \$16.00 per 100.

Chinese Sacred Lily

Large Blooming Size

Chinese Lilies are wonderfully attractive as house ornaments and well deserve a place in the home of every lover of plants. The flowers are pure white with yellow cup. May be planted in the open ground or in bowls. After plants are through blooming in the home all Narcissus may be planted out of doors, and will bloom the following year. Culture of Chinese Lilies the same as for Paper White. Fancy, sound bulbs. 20c each, 90c for 6, \$1.75 per dozen.

Paper White Narcissus

True Grandiflora Type

Everyone knows the Paper White Narcissus. As a quick-growing bulb it has no equal. The flowers are pure white and very fragrant, produced on long, stiff stems. They can be forced into bloom in from 6 to 8 weeks' time, and by planting at intervals of four weeks apart you will have a succession of blooms throughout the fall and winter season. When grown in water, place the bowl in a dark cool place until sprouted 3 or 4 inches. Then move to light location and you will have blooms in a few weeks. Narcissus enjoys a cool temperature as warmth tends to grow excessive foliage. A small amount of charcoal in the water will tend to keep it cool and sweet. Large Size Bulbs—15c each, \$1.25 per dozen, \$9.00 per 100.

Soleil d'Or

Yellow Paper White Narcissus

Beautiful golden yellow flowers with deep orange cup. Can be bloomed just as easy as the Paper White Narcissus in bowls or out of doors. 20c each, 90c for 6, \$1.75 per dozen, \$11.00 per 100.

King Alfred

Jonquil

A species of Narcissus with very fragrant flowers; excellent for cutting. Culture same as for Narcissus.

JONQUIL—Campernelle Giant Single—The largest and finest single Jonquil; color pure yellow; very fragrant. 20c each, \$1.75 per dozen, \$12.50 per 100.

Leedsii (Long Crowned) Narcissus

HERA—Creamy white star-shaped perianth of broad petals and the deeply frilled cup of creamy white with a dainty edging of light primrose makes one of the most chastely beautiful of all daffodils.

No. 1 round bulbs—20c each, \$1.75 per dozen, \$12.50 per 100.

Plant more Gladiolus bulbs this winter. This beautiful flower thrives exceedingly well when planted from November and on during the winter months.

Gladioli will thrive in almost any soil with the exception of extremely heavy soils. They require full sunlight and are liable to injury only from rank manure. Plant the bulbs 6 to 9 inches apart to a depth of about 4 inches. We recommend free use of water during the season of active growth, particularly as the buds begin to show color, which is beneficial in producing fine flowers. We can furnish Gladiolus bulbs from November to March.

The following varieties are all choice selections of **JUMBO HAND-PICKED BULBS**.

General Planting Suggestions

Light, rich loamy soil is best suited to flowers. If the soil is of a heavy nature, add sand or peat moss and a liberal scattering of air-slacked lime to form a better texture. Prepare the soil as fine as possible. The depth of planting flower seeds is very important. Very fine seeds should be planted on the surface and pressed into the soil, then sprinkle over the surface a light mulch to aid germination. Medium sized seeds should be planted 1/4 to 1/2 inch deep, while larger seeds such as Sweet Peas, should go deeper. A light mulch should be spread over all seeds planted, as it is the best method of keeping the soil moist and cool. Water with a fine spray to avoid washing the soil from the seeds. When large enough, thin young plants from 2 to 12 inches apart, depending on the variety. Give them plenty of room to develop, allow plenty of moisture and good drainage and the results will surprise you.

Bachelor Button or Cornflower

(*Centaurea Cyanus*) Hardy annual requiring little care. Height 12 to 14 inches. Nice as a cut flower alone or in mixed bouquets.

Liefgreen's Giant Pansy—Exhibition Strain

PANSIES

PANSIES are so well known they need no description. For successful germination and lovely blooms, prepare the soil carefully. Plant seed during the fall months in a semi-shady location, in well moistened, finely pulverized soil, enriched with a slight amount of barnyard fertilizer or bone meal. Cover seed lightly and firm soil. Keep beds moist but not soaking wet until plants are up. Transplant to 8 to 12 inches apart. Water young plants very sparingly to avoid damping off, but do not allow soil to dry out at any time. Annual.

STEELES GIANT MASTODON JUMBO MIXED

This is the original strain from Steele's Pansy Gardens and are the largest and most beautiful pansies grown. Many colors and color combinations. Stems very long and strong, standing well above the foliage. Pkt. 50c, large pkt. \$1.00, 1/16 oz. \$2.25, 1/8 oz. \$3.50, 1/4 oz. \$6.00.

GIANT SUPER MAPLE LEAF MIXED

One of the largest pansies grown. Immense flowers, long stems and brilliant colors. Large pkt. \$1.00, half size pkt. 50c, 1/16 oz. \$1.50, 1/8 oz. \$2.75, 1/4 oz. \$5.00.

LIEFGREEN'S SPECIAL LARGE FLOWERED SWISS GIANTS

Large size flowers of excellent uniform quality on long, strong stems. All colors and color combinations represented. Many frilled and sweet scented. Pkt. 25c, 1/16 oz. \$1.50, 1/8 oz. \$2.50, 1/4 oz. \$4.00.

LIEFGREEN'S FINE MIXED PANSY

Medium size blooms, extremely free flowering. Especially desirable for larger beds and borders where a mass of color rather than size of the individual bloom is wanted. A full range of color. Pkt. 15c, 1/8 oz. \$1.50, 1/4 oz. \$2.50.

NASTURTIUMS

Plant in February and March for spring flowers and early in the fall in protected places for fall blooming. Nasturtiums prefer dry, rather rocky soils such as we usually call "poor" soil and bear their flowers in such locations in greater profusion than in a rich soil, where they run too much to foliage.

NEW SEMI-DOUBLE SWEET-SCENTED
NASTURTIUMS

SCARLET GLEAM—Bright red extra large flowers. Bush type which throw out runners 12 to 18 inches. Pkt. 10c, oz. 40c, 1/4 lb. \$1.25.

GOLDEN GLEAM—Like Scarlet Gleam but of an attractive bright golden yellow color. Pkt. 10c, oz. 40c, 1/4 lb. \$1.25.

GLORIOUS GLEAM HYBRIDS—Same habit and growth as Golden Gleam and Scarlet Gleam. A glorious assortment of brilliant shades. Mixed: Pkt. 10c, oz. 40c, 1/4 lb. \$1.25.

DWARF DOUBLE GEM MIXTURE—Ideal annual for borders and edging use. The plants are truly dwarf and compact. The flowers are of good size, sweet-scented and semi-double. Colors include all shades and many spotted varieties. Pkt. 15c, oz. 40c, 1/4 lb. \$1.25.

Single Nasturtiums

LIEFGREEN'S SPECIAL DWARF SINGLE MIXED—Compact plants entirely without runners. Same lovely color range as the Tall sort. Pkt. 10c, oz. 30c, 1/4 lb. \$1.00.

LIEFGREEN'S SPECIAL TALL SINGLE MIXED—All single flowers, unusually large. Mixture contains many new colors and varieties as well as the old-fashioned ones. Pkt. 10c, oz. 30c, 1/4 lb. \$1.00.

Nemophila

(Baby Blue Eyes)—Nice for carpet bedding, growing about 6 inches high. Blossoms cup-shaped.

INSIGNIA BLUE—Pkt. 10c, 1/2 oz. 50c, oz. 90c.

Nigella

Hardy annual, 1 foot high, oddly shaped blossoms, elegant foliage. Sow during fall and winter months.

MISS JEKYLL—A long-stemmed sort with beautiful cornflower-blue blossoms. Pkt. 10c, 1/4 oz. 35c, 1/2 oz. 60c.

Nierembergia

(Hippomanica)—Plants form a dense mat, 6 in. high, 1 ft. or more across and are thickly covered with beautiful lavender blue cup-shaped flowers. Plant during the fall and winter months. Highly recommended. Pkt. 25c.

PETUNIAS

PETUNIAS cannot be equaled for beds and borders. They flower through the year even through the hot summer months. Start planting in September and continue through the spring months. Scatter seed thinly on an even well prepared soil and cover lightly with fine silt or sand, pressing firmly with a board so that seed adheres to the soil. A light mulch of barnyard fertilizer or peat moss is beneficial. Thin plants to 8 to 12 inches. Do not over water. Petunias grow from 1 to 1 1/2 feet high, except miniature sorts and the dwarf single bedding types, which attain 8 inches or less.

HOW TO GROW SWEET PEAS

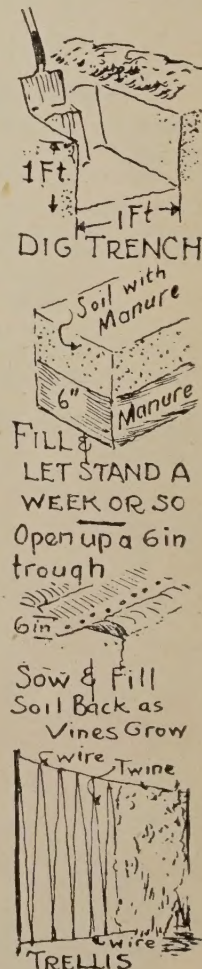

SWEET PEAS are so well known they need no description. We offer only the Giant Flowering Spencer strain in both the Early Flowering and the Spring Flowering types.

CULTURE: Sow seed in a location that receives morning and early afternoon sun. Seed may be planted from early fall to early spring. Dig a trench about a foot wide and deep and fill in with 6 inches of well-rotted manure. Mix a liberal amount of manure with the soil that has been removed and replace it. Flood bed thoroughly and allow to stand several days before planting seed. After the soil has settled sufficiently, open a trench in the bed about 6 inches deep and plant ONE OUNCE of seed to about 20 or 25 feet of row. During the warm weather cover seed about 2 or 3 inches deep and in cooler weather about 1 inch is sufficient. CARE MUST BE TAKEN DURING WARM WEATHER NOT TO ROT THE SEED WITH TOO MUCH MOISTURE. After planting seed soak the trench thoroughly and cover top with a light mulch of peat moss to prevent the surface soil from drying out and cracking. When the plants are up about 3 or 4 inches thin out to about 4 inches apart and begin drawing the earth to the plant to insure a deep root system. This makes a trench on each side of the plant along which the plant is watered. Provide a trellis or proper support as the vines attain great height. Frequent cultivation, water as needed after plants are up and occasional applications of Sweet Pea Food or a good all-purpose commercial fertilizer, will insure a profusion of lovely blooms. A long blooming season may be had by keeping the blossoms picked.

Inoculate Seed with LEGUME-AID

LEGUME-AID is a NITROGEN-fixing bacteria for inoculating legume seed such as SWEET PEA SEED, LUPINS, etc. Legume-Aid increases the yield, improves the quality and enriches the soil. It comes in dust form in moisture-proof packages and no water is needed. One garden packet inoculates up to 5 pounds of Sweet Peas, lupins, Beans or garden peas.

Pkt. 10c, postpaid.

GRASS SEED LIEFGREEN'S

Liefgreen's Lawn Seeds are thoroughly cleaned and tested for purity and germination.

DIRECTIONS FOR PLANTING—First level the ground thoroughly and pulverize the soil. Enrich with our Lawn and Garden Fertilizer at the rate of 100 pounds to 3000 square feet. Scatter the seed evenly over the surface at the rate of 1½ to 2 pounds to 10 x 10 feet for Australian Rye Grass; one pound to 10 x 20 for Blue Grass; one pound to 500 square feet for Bermuda Grass and one pound to 2000 square feet for White Dutch Clover when planted with other grasses. After sowing spread a light mulch of Horticultural Peat Moss over the surface. The mulch will quicken germination and prevent the soil from crusting. Water carefully and regularly with a fine spray, never allowing the surface to dry out until the grass is up. Plant Rye Grass, Blue Grass and White Clover from September 1st until early spring and Bermuda Grass during the spring, summer and fall months.

PEAT MOSS—Excellent mulch and soil conditioner. \$5.00 per bale, f.o.b. Phoenix.
